SUMMARY

I am a UI/UX Designer with over a year of experience creating user-centered designs and enhancing digital experiences. I have a strong focus on visual, aesthetic, and consistent interface design, as well as expertise in user research, interaction design, wireframing, prototyping, and usability testing.

Accustomed to collaborating with cross-functional teams to produce visually and functionally effective design solutions, I utilize Figma, FigJam, Miro, Adobe XD, and Trello as part of the design process to deliver intuitive, engaging, and enjoyable interfaces for users.

EXPERIENCE AND INTERNSHIP

UI/UX Design — PT Ivonesia Solusi Data

November 2025 - May 2026

- Designing user-centric interfaces for internal and client projects, such as Sociomile and KB AI.
- Create modern UI/UX designs that focus on usability, accessibility, and a seamless user experience.
- Work closely with product managers and developers to ensure design consistency and smooth implementation.
- Develop high-resolution wireframes, prototypes, and designs that fit the needs of businesses and users.
- Plays a role in improving the design system and maintaining visual consistency across various platforms.
- Conduct usability testing to ensure that the design is made meets the needs of users and is easy to use

UI/UX Designer — Panaceamed.id

December 2024 - March 2025

- Contributing to the development of Panaceamed.id healthcare platform website with a focus on improving the user experience.
- Apply Design Thinking methodologies to understand user needs and produce relevant design solutions.
- Build and develop system design, including layouting, UI components and visual style guidelines to maintain interface consistency.
- Collaborate with stakeholders and development teams to ensure designs align with business goals and are easy to implement.

- Optimize user flow and interface design to increase engagement and ease of use.
- Collaborate with developers for system design implementation

**UI/UX Designer — PT. GREAT EDU GLOBAL MAHARDIKA
(Bootcamp)**

February 2024 - June 2024

- Designing the EcoCine donation application with a focus on sustainability issues, including planning User flows, interfaces, and visual identities
- Build and develop system design, including layouting, UI components and visual style guidelines to maintain interface consistency.
- Implement the Design Thinking process thoroughly, starting from user research, ideation, wireframing, to prototype testing to ensure relevant and effective solutions.
- Redesign educational applications to improve *usability* and *user engagement*.

**UI/UX Designer —PT LENTERA BANGSA BENDERANG
(Bootcamp)**

August 2023 - December 2023

- Developing the final project: A "Peaceful" mental health app with an approach based on user research.
- Redesign applications and websites to improve *user experience* and improve user interaction flow.
- Implement user research and usability testing to validate the effectiveness of the resulting design.
- Collaborate with the Project Manager to ensure the design is tailored to the needs of users and business goals.
- Focuses on creating system design, including layouting, UI components and visual guides to maintain interface consistency.

EDUCATION

Banten Jaya University
Informatics Engineering

August 2021 - September 2025

EXPERTISE

UI/UX, Prototyping, Web design, Mobile design, Miro, Trelo, Communication, Writing, Adobe XD

Layouting, Design Thinking, Figma, Figjam Design System,

PROJECT

- Sociomile
- KB AI (Knowlage AI)
- Project tim design web panaceamed.id
- Donasiku
- Re-design App Jiwa+
- Re-design App Cariilmu
- Damai app design team project
- Project tim design app ecocine
